STILL JOB FEARETH
GOD, ALTHOUGH
THOU MOVEST ME
AGAINST HIM,

YEA... BUT PUT FORTH
THY HAND AND TOUCH
HIS BONE AND HIS RESH
AND HE WILL CURSE THEE

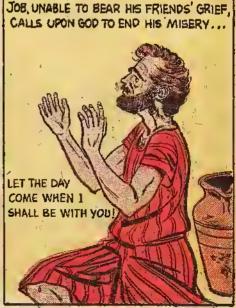

SO GOD PERMITTED SATAN TO COVER JOB'S BODY WITH SORES, TO TRY
HIM FURTHER...

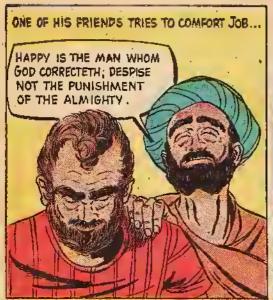

DOST THOU
STILL HAVE
THY FAITH?

WHAT! SHALL WE
RECEIVE GOOD AT THE
HAND OF GOD, AND...
NOT RECEIVE EVIL?

THREE OF JOB'S FRIENDS HEARD OF THE EVIL, AND CAME

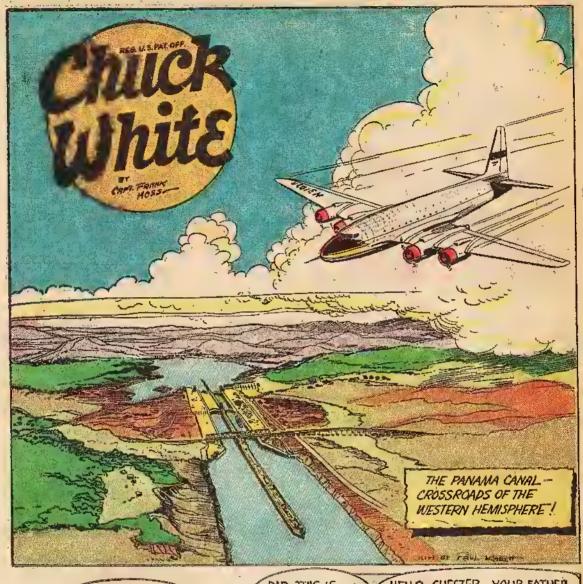

SHIPS USING THE PANAMA CANAL MUST BE RAISED TO THE LEVEL OF GATUN LAKE BY PASSING THROUGH A SERIES OF LOCKS, THE WATER LEVEL OF THE LAKE IS CONTROLLED BY THE DAM AND LOCKS AT GATUN AND THE LOCKS AT MIRAFLORES.

THE PANAMA CANAL SAVES SHIPS CRUISING FROM THE ATLANTIC TO THE PACIFIC A RUN OF OVER 9,000 MILES AROUND SOUTH AMERICA AND RUGGED CAPE HORN...

WHY, IT'S A RELIEF MAP OF THE CANAL ZONE! IT'S WONDERFUL!

BOYS, THIS IS LIEUTENANT ROGERS OF THE UNITED STATES NAVY. HE'S GOING TO TAKE YOU ON A LITTLE TOUR OF THE CANAL ZONE.

OH BOY...!

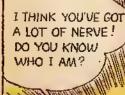

OH BOY,

WHAT'S THE

SORRY, TAKING PICTURES OF THE LOCKS IS FORBIDDEN.

CERTAINLY I KNOW WHO YOU ARE, BUT I ALSO HAVE ORDERS TO CARRY OUT!

THE TIME HAS COME FOR US
TO ACT! AND MIND YOU, I WANT
NO NONSENSE WHILE WE LURE
THE YOUNG NORTE-AMERICANO!

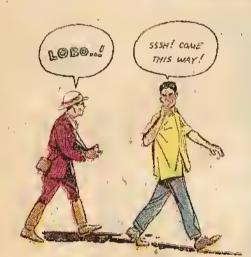

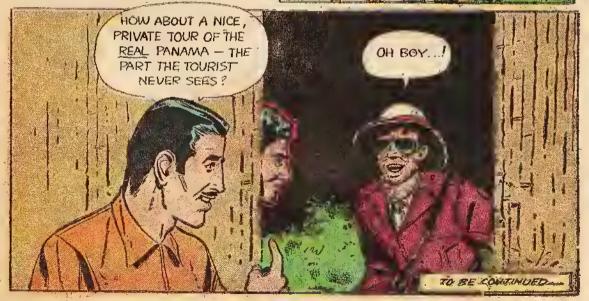

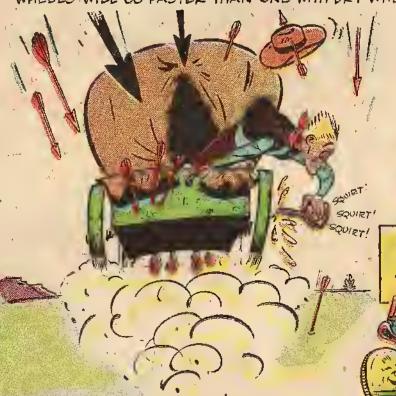

FASTER THAN GREASED LIGHTNING ..

There's nothing faster than lightning -especially "greased lightning". So when we say something is "faster than greased lightning"—well its speed is tremendous!

OUR INVENTIVE COLONIAL ANCESTORS ADDED THE "GREASED" PART, KNOWING THAT A WAGON WITH GREASED WHEELS WILL GO FASTER THAN ONE WITH DRY WHEELS.

THE SOURCE OF SEXPRESSIONS GOES YEARS. OTHERS AR

THROUGHOUT THE UNITED STATES BECAUSE OF OUR COMMERCE WITH SPANISH TERRITORIES.
THROUGH OUR PURCHASES OF SPANISH LAND EVEN MORE PIECES OF EIGHT WERE ADDED TO OUR CURRENCY.
UP TO THE CIVIL WAR THE SPANISH DOLLAR WAS USED ALONG WITH THE AMERICAN POLLAR.

THEY WERE BOTH EQUALIN VALUE. THE SPANISH DOLLAR, WORTH 8 REALS (REH-AHLS'), HAD THE NUMBER 8 STAMPED ON IT. HENCE ONE WHO HAD SEVERAL OF THESE DOLLARS HAD PIECES OF EIGHT." OUR EXPRESSIONS "TWO BITS" (254) AND "FOUR BITS" (504) ARE DERIVED FROM THE REAL, WORTH ONE EIGHTH OF THE SPANISH DOLLAR.

THERE'S NOTHING FASTER THAN LIGHTNING - ESPECIALLY "GREASED LIGHTNING" SO WHEN WE SAY SOMETHING IS "FASTER THAN GREASED LIGHTNING" - WELL ITS SPEED IS TREMENDOUS!

OUR INVENTIVE COLONIAL ANCESTORS ADDED THE "GREASED" PART, KNOWING THAT A WAGON WITH GREASED WHEELS WILL GO FASTER THAN ONE WITH DRY WHEELS

SAID IT

OME OF OUR CURIOUS BACK HUNDREDS' OF SE OF RECENT ORIGIN.

TO READ THE RIOT ACT...

IN 1716 GEORGE I OF ENGLAND OPDERED THAT ALL UNRULY CROWDS BE "READ THE PIOT ACT! ENGLISH LAWS WERE CALLED "ACTS" AND THIS ONE ORDERED THEM TO SCATTER AND GO BACK HOME NO DOUBT . GEORGE III HAD IT READ QUITE OFTEN TO HIS REBELLIOUS AMERICAN COLONIES NOWADAYS WHEN YOU'RE SCOLDED AND WARNED AGAINST ANY FURTHER MISBEHAVING YOU'RE BEING "READ THE RIOT ACT "

HETER MANY DAYS THE CREWMEN SAW A COASTLINE. HISTORIANS ARE NOT CERTAIN WHICH COASTLINE IT WAS. SOME SAY IT WAS NOVA SCOTIA-OTHERS THAT IT WAS NEW ENGLAND. THE FACT THAT THEY LANDED HERE IS THE ONLY THING WE'RE SURE OF."

DEIF RETURNED TO HIS HOME AND TOLD ABOUT THE NEW LAND. LATER, THORFINN KARLSEFNI, ONE OF LEIF'S RELATIVES, WENT TO VINLAND AND FOUNDED A COLONY, SHORTLY AFTER HE GOT THERE ... "

YOU NOW THE FIRST CHILD IN THE NEW LAND! WE SHALL HAVE A SON, THORFINN. CALL HIM SNORR.

WE DO NOT HAVE MANY WRITTEN RECORDS ABOUT THESE VERY FIRST IMMIGRANTS, BUT WE DO HAVE THE ICELANDIC SAGAS ...

THE HEROES OF NORWAY, ICELAND, AND

TO THE DELAWARE COAST."

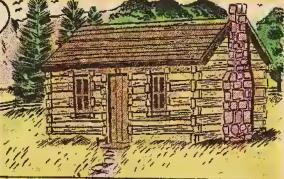

I'M FAIRLY SURE. REMEMBER I BOUGHT MANHATTAN ISLAND FROM NATIVES WHO WERE A LOT LIKE THESE PEOPLE.

MINUIT WAS RIGHT. THE COLONY PROSPERED AND SOON SPREAD OUT INTO WHAT IS NOW NEW JERSEY AND PENNSYLVANIA."

OUR LEADER, WILLIAM PENN, WOULD LIKE TO BUY SOME INDIVIDUAL PLOTS OF LAND. HE WANTS TO START A CITY HERE. I'M SURE THE SWEDES AND QUAKERS CAN COME TO JUST TERMS.

"... CAME TO US FROM SWEDEN."

IN 1825 OUR COUNTRY RECEIVED ITS FIRST LARGE SHIPMENT OF SCANDINAVIANS FROM NORWAY.

MINCE SETTLED HERE, MANY OF THEM TURNED TO FARMING. THEY BEGAN WHAT HISTORIANS HAVE CALLED 'THE CONQUEST OF THE PRAIRIE.' IN ALL, THEY MADE FARMS OF OVER 10 MILLION ACRES OF LAND."

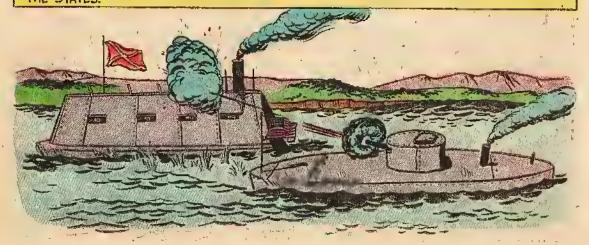

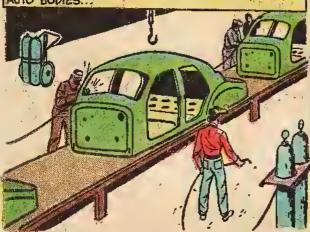

"Some scandinavians played important parts in our history- John Ericsson, for example, a swede, whose invention, the monitor, won an important battle in the war between the states."

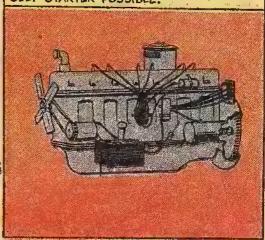

"THE OF OUR GREAT INDUSTRIES OWES MUCH TO THIS RACIAL GROUP FOR IT WAS SWEDES WHO WORKED OUT THE PROCESS FOR THE MANUFACTURE OF STEEL AUTO BODIES..."

"... AND IT WAS ONE OF THIS GROUP WHO INVENTED THE SPRING THAT MAKES THE AUTO SELF-STARTER POSSIBLE."

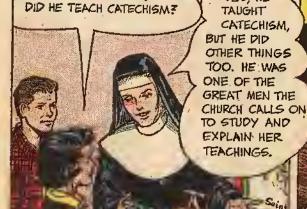

VES-BECAUSE THEY COULD FIT THEMSELVES INTO A NEW LIFE EASILY WEREN'T AFRAID OF HARD WORK, AND COULD ENDURE DIFFICULT LIVING CONDITIONS, THE SCANDINAVIANS MADE FINE ADDITIONS TO THE AMERICAN PATTERN.

WE MUSN'T FORGET THAT WE SECOND-GENERATION AMERICANS CAN MAKE THOSE SAME QUALITIES AN IMPORTANT PART OF THE PATTERN WE'RE STILL WEAVING.

ROOM AND I

YOU CAN.

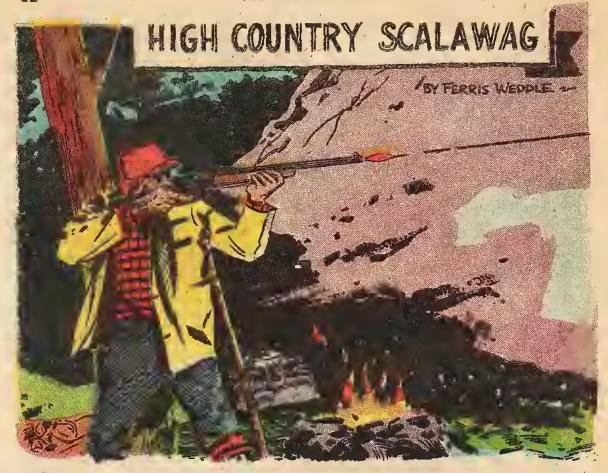

MOT LONG AFTERWARD, WHEN CARDINAL BELLARMINE HIMSELF WAS DYING ...

I HAVE ONE LAST WISH, I WANT TO BE BURIED AT THE PEET OF

AND HE HAD HIS WISH, ALTHOUGH HE DIED IN 1622 CARDINAL BELLARMINE WAS NOT CANON-IZED UNTIL 1930. THE FOLLOWING YEAR HE WAS DECLARED A POCTOR OF THE CHURCH BY POPE PIUS XI. HE IS A FITTING PATRON OF CATECHISTS

O doubt about it, Frank Blenly reflected, he was in a spot. A Montana blizzard was bad enough if you weren't lost and if you didn't have a sprained ankle! The fact remained that he was lost and his ankle pained so much that he cauld barely move. But a man had to keep trying, he told himself.

He habbled toward the shadowy outline of an overhanging ledge. At least he could find protection from the stinging cold of the winddriven snow. He had one sandwich left in his knapsack. He had plenty of amountion far his rifle, but he'd be unable to do much hunting until his arikle healed a bit.

A short time later he had a fire going, mentally thanking the pack rats and other rodents which had made nests near the ledges. Making a crude crutch from a forked limb, he hobbled into the fringe of trees and lugged back some larger pieces of wood, building up a big stack. He'd have to keep a fire going, atherwise he'd freeze. And, too, this was cougar country. One never knew what to expect from a hungry cougar. At least a man lost in the woods felt that way.

frank ate the sandwich, tightening his belt, and trying to forget that he was still hungry. He stared at the fringe of timber, much of it young stuff, swaying in the wind. Snow silvered some of the green boughs. Abruptly, his thoughts ceased as he glimpsed a dark form huddled in one of the nearest trees.

A feeling of excitement in him, he hobbled erect, picking up his rifle. At the base of the tree he saw the evidence of the tree's occupant—scattered bits of bough and dark droppings. Porcupine!

Tensely he peered into the tree and finally tocated the porky. Bracing himself against another tree, he fired at the bulk. He knew he had hit the animal by the duli thud of the bullet. A second shot was necessary before he brought the quilty down.

"A big one—at least twenty-five pounds," he murmured, poking the body which appeared to be an oversized, brownish-yellow pincushion. "Enough meat to last until this ankle heals," he added, carefully picking the porky up by one pay and dragging it to the fire.

Later, eating roosted porcupine, Frank Blenly had to admit that it wasn't the best meat in the world—but it would keep a man alive. Once again the lowly porcupine, a member of the rodent family, had proved his worth: feed for men lost in the wilderness country.

This story reveals the extent of the economic good of the porcupine, known also as an American "hedgehag" and "quillpig." Generally speaking, most woodsmen regard the animal as a nuisance and as just a plain scalawag. Meandering aimlessly, lazily, the porky may be found in high country, low country, right up to the desert's edge. In some areas the animal is almost as destructive as forest fires in destroying trees.

Porkies are fond of invading fruit orchards and alfalfa fields, too. Because of these destructive habits, the animal is usually controlled by any means possible—shooting, trapping, and poisoning. Only in certain areas in remote country is the animal given semi-protection by residents and for the reason mentioned earlier—a man lost and weaponless can kill the indolent creatures with a club and thus keep from starying.

Parcupines may reach a weight of forty pounds in some cases, but the usual weight is from twenty to twenty-live pounds. The way they devour buds, bark, leaves, and various types of ground vegetation one would think their appetite is seldom satisfied.

Campers in porcupine country are convinced that parkies will eat anything from the handles out of axes, shovels, and picks to the leather in saddles and in a man's beli-even if the belt is on the man!

Typical of the havoc coused by a porcupine invasion of a camp site is the story of a northwoods trapper and hunter we can call Bill.

Bill had gone into the Canadian wilderness before the heavy snow and built a good-sized cabin. He brought in his camping outfit and quite a lot of foodstuff. Needing a few more supplies, he went out for them, merely locking the cabin.

The scene that met his startled gaze when he returned left him speechless for a moment. The handles of his axe and hatchet were chewed until they were worthless. His camp stool and cot were also chewed. There was a gaping hate in in the floor near the stave. A spare saddle, bridles, and other leather equipment were gnawed so badly that they would be useless. Food was scattered all over the place. Not even one grain of salt remained.

The disoppearance of the salt gave him the clue: Only one onimal had such a craving for salt —porcupine! And from the appearance of the place and musky odor in the cabin a half dozen parkies had been at work! They'd gnawed a hale in the floor because he had once spilled a skilletful of bacon grease on it. They had gnawed the wooden handles and the leather for the salt left by his hands and by his horse.

The only way to combat such invasions in porcupine country is to make cobins porcupine-proof, with tin and heavy wood. Poison, mixed with salt and left at convenient locations, will often rid on area of these high-country scalawags.

This craving for salt often gets porcupines into trouble. Their IQ is so paor that they will wander right into a busy street if they have a hankering for salt or for some nice young trees.

In one Idaha town a few months ago, the local sheriff was hurriedly called by a storekeeper. The excited man babbled so much that the lawman was sure he was being robbed. So he hurried down. He was being robbed all right—but by a porcupine which was wondering up and down the aisles! Most of the store's customers had left in a hurry!

A Utah law officer had a run-in with a bandit parky, too. Along about midnight he received a call from a near-hysterical ranch woman. Someone was prowling around in the barn, she related. She was sure the intruder was one of the convicts who had recently escaped the pen. The lawman thought so, too, so he really pushed the gas pedal down to reach the ranch. He approached the barn cautiously and yelled at the noisy intruder inside:

. "Come on out, with your hands up?"

The noise inside ceased for a moment, then resumed. The sheriff beamed his flashlight inside—but began to feel rather foolish. The intruder was a porcupine, busily gnawing up a saddle!

In disposition the parcupine is sullen, antisocial, and just plain stupid. Many are killed by cars as they try to cross roods without even bothering to get out of the way. Near wrecks are caused when a speeding car hits a large parky.

Generally speaking, however, parcupines are content to remain in one area for weeks at a time—or in one tree if it offers plenty of foad! During the winter they curl up in caves, or in trees in the lawer country, coming out of their stupor to feed when the urge hits them. The young are born in March or April, sometimes earlier. They came into the world hungry, and in a short time they accompany mama to the treetops.

No doubt you've heard the story that the parcupine can throw its quills. This story has been found to be untrue. There is, however, another story which seems even more unbelievable, but is frue: The baby porcupines, at birth, weigh more than bear cubs! A bear cub weighs from ten to twelve ounces, but young parkies may weigh up to a pound and a quarter.

"A woodsman, even if he likes wild creatures, con't feet close to a porcupine," one naturalist reported a little sadly.

This is due, in no small part, to Mr. Ouch's formidable quills. They are sharp and barbed, and once they penetrate the skin they work in and are extremely painful to extract. Even such hungry hunters as the cougar, wolf, and coyate prefer to let parky go his independent way unless they face starvation. Even then they employ a method that will often allow them to escape with few if any quills.

The parky's stomach is soft and unquilled—and a hungry animal can make a quick kill if he can get at this area. Parky knows this; so, if an the ground, he will bunch his body in a way that will discourage attack. A cougar, coyate, or other food hunter will wait patiently until parky has relaxed his ball-like position and starts to waddle away—then the attacker will leap forward and deftly flip parky over an his quilly back!

It is said that the fisher, a blood-thirsty little animal, will attack porcupines by coming up on them from underneath as they huddle on a limb.

Without daubt, however, the parcupine has, in its quills, not only an unusual defensive weapon but also a very effective one, whether used on humans or on other wildlife creatures. He will never be a favorite creature of mankind, but as a part of our varied wildlife scene, parky has his place. Economically useless, except for the quills used for decorating frontier type clothing and moccasins, parky will continue to be the invaluable friend of the person lost in the woods.

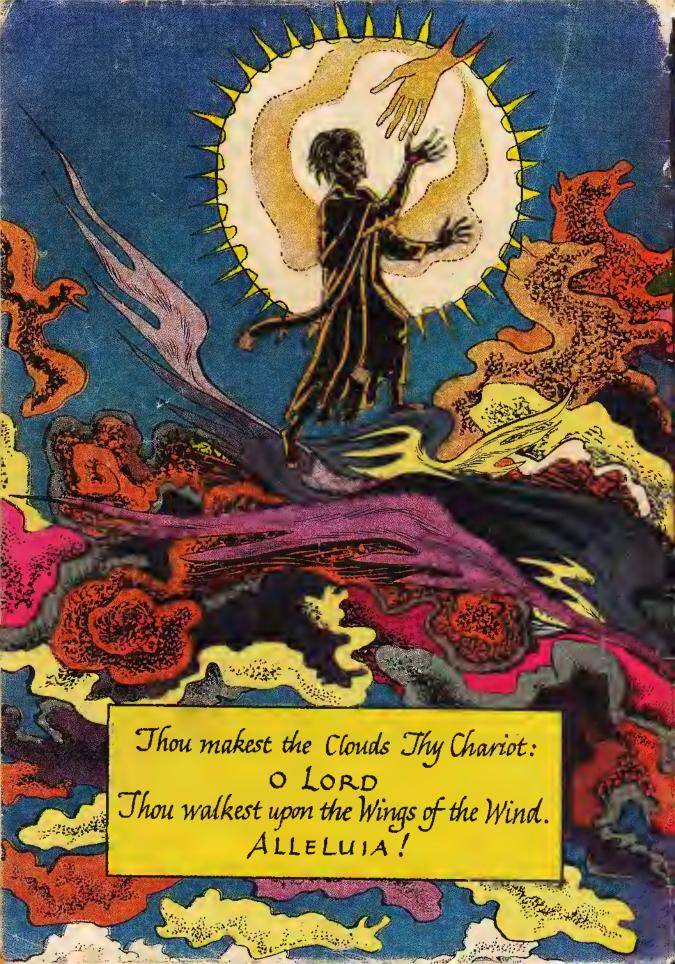

SALFFY.
